Greetings!

The **University of the Philippines - Manila Biochemistry Society (UPBCS)** is a university-based organization that has always been a pioneer of innovation especially with regards to Chemistry and Biochemistry and an avenue for sparking interest with regards to the aforementioned fields of expertise in both students and teachers alike. The organization has always aimed to encourage students to pursue a career in Science and Technology and has consistently forwarded the organization's ideals to its stakeholders through the annual conduct of the Biochemistry Week.

The **UP Manila Biochemistry Week** is an annual celebration that, since its conception, has aimed to open discussion on relevant and impactful themes that affect not only the university but the society in general, especially with regards to Science and Technology. It has aimed to be an avenue for the exchange of ideas between science enthusiasts and have been doing so through the conduct of various activities.

This year's Biochemistry Week will be held from **February 1 to 7, 2020** with the theme, **"Zipzalabim: Unzipping the Potential of the Genome."** The activities prepared for this year's Biochemistry Week include **La Chimie Quizbee, Biochemistry Week Opening, Graduate School Talk, Alumni Talk, Colloquium, Symposium, and Chemazing Race.** In order to achieve our goals, the organization invites senior high school students and teachers to participate in one of our events which is the **La Chimie Quizbee, a National Quiz Competition.**

With that said, may we humbly request your office's help in getting the word about the event out to the schools under your jurisdiction **through a memorandum and/or an advisory in your region?**

We are hoping for your affirmative response regarding this matter.

Thank you very much!

Respectfully,

Geri Ann Apilado
Vice President for Externals
