2nd National Robotics and Engineering Fair (NREF) Philippines

1. Attached is the invitation letter of Joseph R. Jacob, Director, The STEM Hub and President of National Robotics and Engineering Fair Philippines, inviting elementary and secondary school students and teachers to participate in the 2nd National Robotics and Engineering Fair (NREF) Philippines on July 24-25, 2020 at Swiss-Belhotel Blulane, Chinatown, Manila. The event aims to promote the development of scientific and 21st century skills among the citizens of the country.
2. It is informed that the participation in said activity is discretionary on the part of the School Head and the policy on "No Disruption of Classes" per DepEd Order No. 9, s. 2005 entitled "Instituting Measures to Increase Engaged Time-on-Task and Ensuring Compliance Therewith" shall be observed.
3. Attendance to said activity is on personal time and expense.
4. Details of the said activity are in the enclosure.
5. For information, guidance and compliance.

Dear Dr. Epe,

SUBJECT: 2nd National Robotics and Engineering Fair (NREF) Philippines

A pleasant day to you!

We would like to invite your organization and respectfully seek your endorsement to the 2nd National Robotics and Engineering Fair (NREF) Philippines on July 24-25, 2020 at Swiss-Belhotel Blulane, Chinatown, Manila. This big scale robotics and engineering research event aims to promote the development of scientific and 21st century skills among the citizens of the country.

Robotics program was introduced in many of our public and private schools nationwide to show students that engineering and Information Technology can be fun by making abstract knowledge concrete. Working with robots and using it as a tool for research enhances creative problem solving techniques and encourages the development of basic communication and interpersonal skills as well as the ability to collaborate and convey complex ideas to a fellow students or colleagues.

The three main events in the NREF 2020 are as follows:

Events	Categories
URC (Ultimate Robot Championship)	Autonomous wheeled robots a.) 1 kg b.) 2 kgs c.)3 kgs & up open for all ages
Engineering Research Fair (open for research enthusiasts of all ages)	Topics include: Astrophysics, Energy & Space, Physics, Electricity & Electronics, Inventions & Innovations, Robotics, Computer Science & Math
Robotics Design Competition (for those who are interested in designing robots and making intelligent machines)	Robotics and Intelligent Machines for <ul style="list-style-type: none"> • Business • Environment

This curricular move targets to support the thrust of the Department of Education curriculum in developing learners that are creative, critical thinkers and problem solvers. Our company, the STEM Education Training Hub have been giving training programs on robotics for teachers and students for several years now and have garnered championship awards in the international robotics competitions.

We respectfully seek for your favor by helping us reach students and teachers who have interest in robotics, designing, inventing and scientific research. And together, through this program, we could be able to cultivate a society full of innovators, critical thinkers, and problem solvers. General rules and guidelines will be sent through email upon request using the email nref.ph@gmail.com.

Thank you very much!

Sincerely, [Signature]
