**ALLAN G. FARNAZO**

Director

Department of Education – Division of Davao City  
 E. Quirino St., Davao City, Philippines

Dear Sir Farnazo:

Greetings!

For the past nine years, the *Ateneo de Davao University (AdDU) – School of Engineering and Architecture (SEA)* has been in the forefront of showcasing the strengths and competencies of our departments namely Architecture, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Electronics Engineering, Industrial Engineering, and Mechanical Engineering. Last year, we were also able to showcase the newly added department, Aerospace Engineering. With the celebration of its eleventh year, and the newly added department, the Robotics Engineering, allow us to give emphasis on the importance of the fields of engineering and architecture with regards to the growth of our country, AdDU - SEA will be holding the **SEA Fair 2021** with incorporated educational activities to encourage more young people to pursue higher studies, and eventually, careers in these fields. While it was traditional to hold this event on a face-to-face setup, given the circumstances, we will be celebrating it online this year.

The Engineering and Architecture Student Executive Council (EASEC) is the student organizing body of the AdDU – SEA and will be spearheading these events. In line with this, we are inviting schools within Region XI to participate in the following events:

## CONCEPT PAPER

- I. **Project Name:** School of Engineering and Architecture (SEA) Fair 2021
- II. **Project Head:** Ethan Joshua U. Daquipil  
*SEA Representative*
- III. **Rationale:**

Projects that are completed demonstrate what we know. Future projects, on the other hand, decide what we will learn. Technology, together with the engineers and architects who pioneered it, promote the **concept** of globalization and international development. Due to the heightened population of engineers and architects, it now goes hand in hand with expansion and progression. Therefore, the promotion of education must be emphasized especially in the field of engineering and architecture. Through the years, SEA had accomplished various masterpieces and undertakings. The cluster matured into a full-bloomed flower with its rich scholastic compromise to the students. Nonetheless, just like any other cluster, the SEA also started with a single step, a step that led to millions more before reaching the present state.

The Ateneo de Davao University (AddU) began offering Chemical Engineering in 1979, producing the first batch of graduates in 1984. SEA, established in 1987, renders eight assorted programs, namely Architecture, Chemical Engineering (ChE), Civil Engineering (CE), Computer Engineering (CpE), Electrical Engineering (EE), Electronics Engineering (ECE), Industrial Engineering (IE), and Mechanical Engineering (ME). And introduced another one just recently, the Aerospace Engineering (AsE).

The year 2011 marked the commencement of the said cluster as a College of Engineering and Architecture (CEA) and for the year 2012, it was already recognized as a School of Engineering and Architecture (SEA). This is in response to the aim of the university to focus further on being able to develop future engineers and architects who will glow new trails in the upcoming millennium.

To give emphasis on the importance of pursuing higher studies in the fields of engineering and architecture with regards to the growth of our country, AddU will be holding the SEA Fair 2021 with the theme: **ExcEAd: Innovation without borders, connecting through ideas**. It will be incorporated with educational activities such as the interhigh/interdepartment events, and respective competitions for each course, and quiz bow; Considering the current situation this year, the SEA Fair will be held online with the given parameters that could still make this possible.

From the Office of the SEA Representative

**IV. Objectives:**

- To share and showcase the abilities of the SEA students.
- To focus on the importance of SEA with respect to national progress.
- To inspire and encourage the youth to take higher studies, and eventually, careers in the fields of engineering and architecture.
