ABOUT THE COURSE

The global wellness tourism market is expected to increase from a valuation of USD 880 billion in 2023 to USD 2.3 trillion by the end of 2033. Malaysia is increasingly recognised as a world-leading destination for medical and healthcare tourism, seeing its business revenue nearly triple in less than a decade. The medical tourism business generated close to RM1.7b in 2019, partly attributed to the country's favourable geographical location.

The developing Muslim populations and their acquiring power and additionally more prominent mindfulness of Muslim values make a requirement for the tourism service industry to begin considering the market. While there is an enormous potential for the business sector to develop, promoting Muslim-friendly medical tourism service marketing mechanism or products are not simply due to the different needs among Muslim medical travellers comprehensively.

What is healthcare and wellness tourism? What does it take to develop and manage healthcare and wellness tourism? How should it be implemented? Are there opportunities in medical tourism targeting Muslims? These are among the questions that will be featured throughout the lectures and technical visits.

This training course will enable the participants to acquire knowledge and share experiences, particularly in developing strategies through lecture sessions, project presentations, case studies, and site visits.
