Good day, Sir!

Greetings!

In today's dynamic research landscape, where interdisciplinary collaboration reigns supreme, mastering the fusion of quantitative and qualitative methodologies is paramount for scholarly success. Just as proficient research pedagogy lays the groundwork for students' academic journey, adept integration of these methodologies serves as the compass guiding researchers through the complexities of inquiry. From designing robust studies to navigating the nuances of data analysis, our Research Fellowship Program Across Discipline equips participants with the tools and expertise needed to excel in diverse research environments.

The training workshop aims to equip participants with the knowledge and skills necessary to conduct rigorous and multi-dimensional research projects. Through theoretical foundations, practical applications, and hands-on exercises, participants will clearly understand key concepts, enhance their research writing skills, and gain the expertise needed to make informed decisions on selecting appropriate methodologies for their research questions. Ultimately, the goal is to empower participants to produce high-quality research and contribute meaningfully to their respective fields.

The GET International in partnership with Zamboanga Peninsula Polytechnic State University humbly request that you support this issue in any way that you can, for an immersive workshop on "Research Fellowship Across Discipline: Bridging the Gap through Integrating Qualitative and Quantitative Research Methods".

- Date: April 11, 12, and 13, 2024
