Ma'am,

Non-communicable disease is one of the priority program of the Department of Health. It focuses on diseases like Hypertension, Diabetes, Kidney problem and cancer. Under the Philippine Package for Essential Medicine (PhilPEN), all ages 20 years and above should be assessed but we have no program that deals with those with type 1 diabetes.

In our continued efforts to enhance the delivery of healthcare services especially among children and adolescents living with type 1 diabetes, the Department of Health in collaboration with Humanity for Inclusion, initiated the project Changing Diabetes in children.

In view of this, we would like to invite 1 Medical Officer and 1 School nurse from your end to a 3 days Basic Training on Diabetes in Children and Adolescents for Healthcare Professionals on August 18-20, 2025 at Big 8 Hotel, Quezon Blvd., Digos City, Davao del Sur. Meals and accommodation and training materials will be provided by the Humanity and inclusion, while travelling allowance and other incidental expense will be charge to sending agency subject to the usual accounting procedures.

Hoping that this request be given utmost consideration.

Thank you and God Bless.

Respectfully yours',

JONNA A. MASONGSONG, MD, FPSMS, MAHA, MPH
Provincial Health Officer II
